## Home-View Dual Format Screens

Harkness Screens' Home-View Dual Format wall/ceiling screen is a brand new concept in projection screens - two surfaces / formats in one screen.

The white epoxy coated aluminum screen housing contains two separate independently controlled motorised rollers each one holding a different surface. This provides users with a choice of screen type and format in one stylish unit allowing them to keep multi-format projectors in a fixed position. Available in a range of sizes to 290 x 163cm (114 x 64") screen surface choice includes matt white, gain, rear projection and 3D. Formats are 16:9 and 2.35:1.

The remotely operated screen is supplied complete with RF remote control and wall/ceiling mounting brackets.

Dual Format screens are ideal for any presentation environment where a change of format and/or surface may be required such as presentation and lecture rooms and home cinema.
